

AMBULANCE FLEET

Maintaining a fleet of seventy-two (72) ambulances and thirty-three (33) supervisory and support vehicles is a difficult task. Medic utilizes Dodge, Chevrolet and Internationals along with Dodge Sprinters.

Medic's onsite Fleet Department brings more than 100 years of valuable automotive industry experience to the Agency. The Fleet Department's focus is the same as every other department within Medic: to deliver excellent patient care to the right place at the right time. Five master mechanics and additional support technicians accomplish this goal by keeping the Agency's sizeable fleet safely on the road, ensuring that vehicle reliability is never a factor in Medic's ability to deliver excellent patient care. Scheduled and unscheduled maintenance needs are handled in-house, resulting in less down time for crews and vehicles. Medic also maintains an ongoing remount program.

MULTI-CASUALTY RESPONSE UNIT

2001 FL70 Freightliner with a 24' Hackney body with rear command module which responds to large scale incidents with Special Operations Technicians to assist with patient care and provide extra equipment or supplies

MASS CASUALTY AND EVACUATION BUSES

Medic has two (2) 2009 International FE300 chassis modified by Sartin Services to provide transportation of twenty non-ambulatory patients as well as ten wheelchair patients. The buses are equipped with Oxygen, heart monitors, and other medical supplies to evacuate multiple patients with special medical needs, eliminating the need for multiple ambulances to respond to a mass casualty incident.

KUBOTA 4X4 UTILITY VEHICLES

Four (4) Kubota vehicles have been retrofitted to be able to accommodate a crew of 2 along with a standard stretcher and medical supplies, allowing the Special Events team to transport patients out of a crowded event or remote access area for further care.

TAC 1:

The SWAT Tactical Operations Medical Response Vehicle (Tac-1) serves a variety of functions in order to deliver the highest quality of care to Tactical Officers, bystanders, and suspects encountered. Tac-1 provides rapid response for a Tactical Medic to high casualty SWAT incidents (active shooter, barricade suspect, etc), serves as a routine response vehicle for the on-call Tactical Medic, serves as a rehabilitation center for Tactical Officers/Medics, provides transportation to and from training evolutions, provides a secure environment for storage of tactical and medical equipment, and serves as a location for Tactical Medic Overwatch, where any backup Tactical Medics and/or Supervisors can provide operational support to the primary Tactical Medic.
